VacuFlush® 706 Toilet

Replace portable marine toilets with a permanent ceramic fixture in the same space!

Upgrade the portable toilet on your small boat with a VacuFlush 706 toilet. Combined with a vacuum generator, vacuum holding tank or small holding tank system, it offers all the advantages of a VacuFlush system in a space-saving package.

Compact size – low overall height makes it ideal for platform installations.

Water efficient – uses as little as one pint (.5 liter) of fresh water per flush.

Anti-splash rim keeps water in bowl while underway.

Low power consumption – uses only 4-6 amps per flush.

Wood seat construction offers lasting strength.

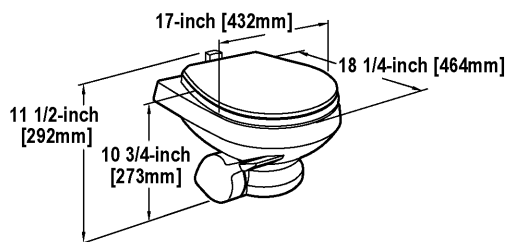

Available in white and bone colors.

706 Model Information

Model	Seat Height	Discharge	Product Weight
706	Low-profile height. 10-3/4 in. (273mm)	Below-floor discharge.	27 lbs. [12.3 kg]
